[page 4]

THE NEW CATTLE AND HOG TRUCK-IN FACILITIES

Enables the Kansas City Stock Yards Company to give prompt and efficient service and to handle the increasingly large volume of truck in shipments without delay.

The receipts of live stock by trucks during 1935 were 144,650 trucks, containing 1,415,914 head.

Page Four

SPECIAL NOTE

In explanation of the unusual decrease in receipts of live stock for the year 1935, we wish to call attention to these facts:

For the three years prior to 1935, severe drouth conditions prevailed in the west and southwest which caused a feed shortage and reduced live stock production. This decreased production was further influenced by the government's reduction campaigns in hogs in 1933 and the government's purchases of drouth cattle and sheep in 1934. The year 1935 had to stand the brunt of the consequent readjustments in receipts.

The 1933 hog receipts included 710,389 pigs and sows consigned to the government under their surplus reduction program.

The 1934 receipts included 675,453 cattle, 236,127 calves and 267,479 sheep consigned to the government on account of their drouth relief purchases.
