#### 4. B. NEUROPSYCHIATRICAL REPORT.

White, 38; Unable to administer either Wells Revised Alpha or the Beta Examinations owing to poor vision, corroborated. Surpasses 44 per cent in his voluntary motor output-tapping test - a good performance. Surpasses 96 per cent in accuracy on the manipulative dexterity test - Ferguson Form Board No. 3 - an excellent performance. Intelligence estimated in highest one-third, comparatively low voluntary motor output, but excellent test on hand and eye coordination. (Percentiles based on inmate standardization.)

Neurological examination essentially negative

This is a tall, slender, well developed, well nourished male. He makes complaints of being afflicted with optic atrophy, is now confined in hospital for treatment of a cough. Atrophic symptology is negative. Subject denies any syphilitic history. Investigation will be made of complaint. Reports this to be his first conflict with the law and available records do not dispute the claim, now stands committed to this institution under sentence of 1 year and 6 months for violating election fraud act. Gives as his occupation in civil life heating engineer.

This man reports 15 years academic training but inability to administer psychometric test prevents a satisfactory comparison.. He is frank, courteous and cooperative in manner and it is believed he will make an agreeable adjustment to institutional regimen with entire absence of disciplinary problems. Apparently entertains no opposition to society, or the law enforcement officials. The examination reveals no delusional trends and discloses no psychotic symptoms.

CLASSIFICATIONS No test intelligence, estimated highest one-third bracket; emotionally adequate; socially inadequate.

RECOMMENDATIONS: Minimum custody.
