

Kansas City Mo. 3—25—38

Dear Governor Stark.

Am writing you in regards to our city election. It is well known all over the nation that there were killings at our last election in 1934.

Just before that election I wrote a letter Governor Park asking him for protection hut he ignored, it, and there were killings proving that we really needed protection.

We do not get the proper protection from our police officials.

I see by this mornings paper that a committee of women has petitioned you for malita protection

I want to say as I observe the determination of election workers precinct captains to carry on as they have in the past, makes it inevetable that killings will take place again unless we are granted protection from all the protective source that is within your power.

After these petitions and this letter to you and you fail to grant us protection then where may the blame be laid if killings do happen?

Yours truly

Lincoln A Kelly
