Maj. Lloyd C. Stark
Louisiana, Mo.

I understand from St. L. newspapers, that there is a boom to put you up as a Democratic governor.

With your German name, I am positive that the german societies will go for you. We have fought hard to clean out the republican party but the irish Democrats in power now, have forgotten to give us our share in Personal, which is very bad and discussed at the City Hall administration, with Republicans and Engineers holdover.

The german element are thoroughly discussed with politics unless a german name is presented, it will flap. We will not stand for any irish candidates, and the republicans are working hard to put such a man up to compete for the governorship.

I have been a hardworker under the Democratic Banner, and the excuse in the Engineering positions are a none bi partisan selection. Having proof that all Engineers in the City Hall state and Washington are Hoover for President men are still in power.

Hoping you will not give up, as a member consulting engineer of the Walsh fire clay Products Co building a Plant in 1918 in Vandalia Mo.

I will be glad to assist you to bring over the german votes.

Awaiting your reply

I remain yours Respectfully
Albert G. Seelig
