Kansas City MO

Honorable Sir

You being the governor of our state I think maybe you can change conditions in Kansas City.

I am an Orderly in the General Hospital and need a job so much so I will withhold my name[.] It is hard for a cripple with not much school to find work so you will understand.

Somebody told me that there was a law against it but anyway they are making those poor women work twelve hour shifts and fixing it so they have to go home at twelve and four o'clock in the morning and some of them are so afraid to be on the streets at that time. Us men can stand it but it is so inhuman to work women that way with never a Sunday or Holiday off.

Please help conditions for them I know you will.

Thank you for your kindness

Bill
