

KANSAS CITY, MISSOURI

May 20 1938.

Honorable, Lloyd Stark
Governor of the
State of Missouri
State House
Jefferson City, Missouri

Dear Governor Stark;

You have done some fine work in your endeavor to clean up certain political conditions here in Jackson County.

It is common knowledge, there are many precinct workers drawing money on State jobs on which they never work. This padded pay-roll condition exists especially in the State Oil Inspection Department and the State Grain Inspection Department (That section in Kansas City Missouri). Many of these men are Machine workers and many operate or work in the Gambling places here, and spend their entire time at this work.

You are doing a fine job, more power to you.

A friend.
